

Grade 6 Math - Supply List

Welcome to 6th grade! I will be teaching you math this year. I am so excited to introduce you to new algebraic concepts and ideas! We will be reviewing fractions and decimals. The exciting part of the year is when I introduce you to negative numbers! We will learn how to add and subtract, multiply and divide negative numbers with positive numbers. We will also learn how to solve basic equations. This will all help you get ready for pre-algebra in 7th grade!

The one important thing you can do over the summer is to review your math facts. Knowing your math facts is key to understanding all ideas and succeeding in math this year.

Along with your regular school supplies, make sure you have the following for math class:

- Dedicated two-subject notebook and a separate folder
- Extra loose-leaf paper to show work on
- Red correcting pen
- Lots and lots of pencils
- Eraser toppers or a few individual erasers
- Pencil sharpener
- Ruler
